

A clearer decision on what to fix first

example.sa

Ready to build

EXECUTIVE SUMMARY

The store has a workable foundation, but clear gaps weaken brand, product, and trust signals. Start with the highest-impact priorities.

90%

Scan coverage

84%

Result confidence

5

Pages checked

RECOMMENDED FIRST MOVE

Store and brand identity are not clear enough

Checked 2026-07-16. This score measures site readiness and does not guarantee ranking or mention on any platform.

PERFORMANCE SCORECARD

Where readiness stands today

Seven weighted components. Unavailable data stays unavailable and is never treated as failure.

Strongest signals

72 Structured data

68 Trust signals

Biggest opportunities

42 Entity clarity

49 Answerability

PRIORITIES

The highest-impact issues

Every issue is tied to evidence from a checked page and an actionable fix.

01**High impact**

Store and brand identity are not clear enough

WHAT WE FOUND

The checked page does not explain the brand, category, and market clearly enough.

THE FIX

Add a direct brand and category description to the home and about pages.

<https://example.sa/>

02**High impact**

Product pages do not answer buying questions

WHAT WE FOUND

The available information is fragmented instead of being written as direct answers.

THE FIX

Add concise answers about use, selection, specifications, shipping, and returns.

<https://example.sa/products/example>

03**Medium impact**

A key trust signal is difficult to find

WHAT WE FOUND

The checked page does not expose an important policy or trust reference clearly.

THE FIX

Link the relevant policy or trust information from product pages and the footer.

<https://example.sa/products/example>

Sequence work by impact. Do not try to fix everything in a single week.

EXECUTION PLAN

Your 30 / 60 / 90-day plan

Fix what blocks understanding, strengthen facts and content, then measure the change.

Days 0 - 30

Remove blockers

- Add a direct brand and category description to the home and about pages.
- Add concise answers about use, selection, specifications, shipping, and returns.

Days 31 - 60

Turn facts into answers

- Add direct answers to high-value buying questions on the right pages.
- Make brand, policy, and entity facts consistent across the site.

Days 61 - 90

Prove improvement

- Rescan with the same method and compare components and evidence.
- Connect search and analytics data to measure discovery and visit source separately.

WHAT SUCCESS LOOKS LIKE AT DAY 90

Higher target component scores, fewer failed evidence checks, better coverage, and connected search and traffic...

ORGANIC GROWTH

Keywords, pages, and content

These are candidates from checked pages, not search-volume data. Validate them when search data is connected.

MEASUREMENT AND NEXT STEP

How to prove the work had impact

Keep site readiness, search discovery, and observed answer-engine visibility separate.

01

Readiness

Rescan with the same method and compare components and evidence.

02

Search discovery

Connect Google Search Console to measure queries, pages, and clicks.

03

Visits and conversion

Use analytics, tagged links, and order reconciliation to prove source.

Search Console is not connected - this is not a zero

Clicks, impressions, and position cannot be inferred from site pages. These values require an independent data source.

https://search.google.com/search-console?resource_id=sc-domain%3Aexample.sa

Important limitations

- Search Console or analytics data is not connected, so observed search and conversion metrics remain unavailable.
- The score is a point-in-time readiness snapshot and does not guarantee ranking, mention, or citation.

Keep the report. Then turn priority one into execution.
